

Basis instructions for DNR's private website.

1. The DNR private website is hosted here within DNR and uses your local login account credentials for authentications, i.e. the user name and password you use each day to log into your PC.
 - a. You will be asked to "Choose a digital certificate" simply click "OK" then you will get the "connect to private.dnr.ne.gov" dialog box, enter your username and password.
 - b. You'll need to preface your username with "DNR\" so your login will be checked against our server.
 - c. Your username is "First initial" "lastname", rgower for example. Your password is the password you use each morning to log into your machine. (not your email password)

EXAMPLE:

Username: dnr\rgower

Password: Windows password, NOT email password
