Geographic Area Determined to Have Surface Water Hydrologically Connected to Ground Water for the Purpose of Fully Appropriated Designation

Determination made by the Department of Natural Resources on November 3, 2004

-  Hydrologically Connected Surface and Ground Water
-  Natural Resources District (NRD) Boundaries
-  County Boundaries
-  Township Boundaries

This map represents the geographic area within which it has been determined that surface water is hydrologically connected to ground water for the purpose of designating the surface water resources within the Hat Creek Basin, White River Basin, Niobrara River Basin above Mirage Flats Diversion Dam, the Box Butte Creek Subbasin and the Snake Creek Subbasin as fully appropriated. Additional information regarding the designation can be found in the order issued by the Department of Natural Resources on November 3, 2004.
